

Spiritual, Moral, Social and Cultural Education Policy

Summary

Spiritual, moral, social and cultural education helps students develop personal qualities, which are valued in a civilised society. For example, thoughtfulness, honesty, respect for difference, moral principles, independence, and self-respect. It is taught across the curriculum and throughout school life. It is linked closely to our school aims and philosophy.

Aims

To enable students to develop their personal qualities and become:

- responsible for themselves, accepting an appropriate measure of responsibility;
- confident and competent both academically and socially;
- able to distinguish between right and wrong;
- able to articulate their own attitudes and values;
- able to understand and be sensitive to the beliefs, values and ways of life of others, responding appropriately to injustice and prejudice;
- caring, considerate and compassionate;
- skilled in working collaboratively and independently;
- able to reflect on their learning and plan for future development;
- able to respond positively to challenges and problems.

All staff are involved in spiritual, moral, social and cultural education. These qualities should be evident in the way that students and adults, including visitors, interact throughout the school, in accordance with many other existing qualities.

SPIRITUAL DEVELOPMENT

Definition

Spiritual development is the development of the non-material element of a human being which animates and sustains us and, depending on our point of view, either ends or continues in some form when we die. It is about the development of a sense of identity, self-worth, personal insight, meaning and purpose. It is about the development of a student's 'spirit', which some people may call the development of a 'soul', 'personality' or 'character'.

MORAL DEVELOPMENT

Definition

Moral development is the building of a framework of moral values which regulates personal behaviour. It is also about the development of student understanding of society's shared and agreed values. It is understanding that there are issues where there is disagreement and it is also about understanding that society's values change. Moral development is about gaining an understanding of the range of views and the reasons for the range. It is also about developing an opinion about the different views.

- a considerate style of life;
- a respect for others' needs, interests and feelings, as well as their own;
- a desire to explore their own and others' views;

- an understanding of the need to review and reassess their values, codes and principles in the light of experience;

It is about functioning effectively in a multi-racial, multicultural society. It involves growth in knowledge and understanding of society, society's institutions, structures and characteristics, economic and political principles and organisations, roles and responsibilities and life as a citizen, parent or worker in a community. Cultural development is about students understanding their own culture and other cultures in their village, town, region and in the country as a whole. It is about understanding cultures represented in Europe and elsewhere in the world. It is about understanding and feeling comfortable in a variety of cultures and being able to operate in the emerging world culture of shared experiences provided by television, travel and the internet. It is about understanding that cultures are always changing and coping with change. Promoting students' cultural development aims to value students' individual experiences, whilst developing their appreciation of the wider world.

Students at SVCS will be working towards:

- an ability to recognise and understand their own cultures and values;
- an ability to appreciate cultural diversity and to respect other peoples' values and beliefs;
